SHAILYN MOORE

Software Engineer

SUMMARY

2.5 years of software engineer experience. A creative, detail-oriented, software engineer interested in the community. Proven track record of creating and implementing successful front and back-end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at Victorious SEO, Los Angeles, CA

January 2023 — Present

- Collaborated with product team members to ensure success and development proficiency.
- Executed development, testing, and peer-review of product capabilities and accelerators.
- Ensured efficient and on-time delivery of product features and capabilities.
- Maintained & reviewed internal technology infrastructure, including security, performance & support.

Full-Stack Software Engineer at #100Devs Agency, Los Angeles, CA

January 2022 — December 2022

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Created full-stack web applications using node.js, express.js, MongoDB, and react.js with a particular focus on object-oriented programming
- Applied agile methodologies like SCRUM for project management

Notable Projects:

Helio Salon (Front-End Web App) – Users can view the services provided by the salon and book appointments and select the services requested and a specific hairdresser if desired.

Binary Upload Boom (Full-Stack Web App) – A user-friendly and accessible website that mimics all the features of Instagram including feeds, posts, commenting, and user profiles.

Dandelion (Full-Stack Web App) – An application that allows users to make an account where they can manage their budgets month to month, create and edit to-do lists, and seek inspiration from their own mood board or view other posts on the goals feed.

Full-Stack Software Engineer at ShaiTech, Los Angeles, CA

August 2020 — Present

- Contracted by over 15 companies to create website and web applications. I tailored each application to the needs and requirements of each company.

Notable Clients:

HeartLA Non-Profit – A revamp that includes an interactive interface to suggest resources based on user's needs, an interactive map, and hidden password-protected pages

H.A.T. Diesel Repair – This website includes the ability for clients to book services and had e-commerce options for clients to pay ahead of time for service
